Dear Parent or Guardian:

ANY student who is interested in participating in our varsity athletic program MUST have a physical on file in the athletic office before they will be allowed to participate in any official practice or game.

This physical is not the same as a regular physical exam administered by our family physician. It is a screening to ensure that your child is medically eligible for participation in accordance with our association's guidelines. Memorial Day School recommends that every child receive a regular physical exam from his / her primary care physician to ensure general good health.

Parent / Student-Athlete Commitment Form

Athlete’s Last Name ____________________________ First Name ____________________________ Grade _______

Sport(s): _____________________________________________________________________________

Dear Parents and Student-Athletes:

We are pleased that your student athlete has the opportunity to participate in athletics at Memorial Day School. We feel it is very important to share some basic guidelines regarding the commitment both you and your student-athlete are about to make and thereby, have your support throughout the season(s).

We hope you have considered both the benefits and constraints involved in being a team member. Each athletic season consists of weeks of practices, games and travel. Our coaching staff will make every effort to plan and organize the entire season and we will advise you of practice times, game dates and travel arrangements.

We have listed items below that each parent and student-athlete need to be aware of. It is the parent’s and athlete’s responsibility to become aware of the commitment, rules and regulations of being on an athletic team.

1. Be certain your student-athlete is committed to participating at this level of competition and is willing to give the time and effort both at practices and games throughout the entire season.

2. Consider the time spent on sports and the impact on your family as well as on study time. Also consider other activities in your life that will be impacted such as church activities, other sports teams and other school involvement. Your student-athlete will be expected to attend and participate in all practices and all games including those scheduled during school holidays. The team needs and must have your commitment to be successful.

3. Realize that there is potential for injury in any sport. Your medical coverage should be up-to-date before the season begins.

4. Be cognizant of the coach’s requirements and expectations so you can better understand his/her methods and emphasis.

5. Parents, consider and discuss with your student athlete that their conduct should reflect and reinforce the values and rules of our school. These rules will be enforced not just during the school day, but at all athletic events.

6. Evaluate the financial cost for participation on the team.

7. As a parent, be willing to support the team in whatever way you can (i.e. refreshments, encouragement, attendance at contests, etc.)

8. Realize to quit a team is something the coaches and the athletic department heartily discourage and should not be done without considering the ramifications. Student-Athletes who make the commitment to play for one of our Varsity teams, only to quit before the end of the season (playoffs included), may be denied joining any other Varsity team.

My signature below indicates that I have read this document and have discussed it with my student athlete.

### Recommendations

I have examined the above-named student and completed the preparticipation physical evaluation. The athlete does not present apparent clinical contraindications to practice and participate in the sport(s) as outlined above. A copy of the physical exam is on record in my office and can be made available to the school at the request of the parents. If conditions arise after the athlete has been cleared for participation, the physician may rescind the clearance until the problem is resolved and the potential consequences are completely explained to the athlete (and parents/guardians).

CONCUSSION INFORMATION FOR STUDENT ATHLETES

NAME OF SCHOOL:  MEMORIAL DAY SCHOOL, SAVANNAH, GEORGIA

According to the article “Concussion” by the Mayo Clinic Staff, a concussion is defined and has symptoms as follows:

Definition:

A concussion is a traumatic brain injury that alters the way your brain functions. Effects are usually temporary, but can include problems with headache, concentration, memory, judgment balance and coordination. Although concussions usually are caused by a blow to the head, they can also occur when the head and upper body are violently shaken. These injuries can cause a loss of consciousness, but most concussions do not. Because of this, some people have concussions and don’t realize it.

Concussions are common, particularly if you play a contact sport, such as football. But every concussion injures your brain to some extent. This injury needs time and rest to heal properly. Luckily, most concussive traumatic brain injuries are mild, and people usually recover fully.

Symptoms:

The signs and symptoms of a concussion can be subtle and may not be immediately apparent. Symptoms can last for days, weeks or even longer.

The most common symptoms after a concussive traumatic brain injury are headache, amnesia and confusion. The amnesia, which may or may not be preceded by a loss of consciousness, almost always involves the loss of memory of the impact that caused the concussion.

Signs and symptoms may include: * Headache or a feeling of pressure in the head  * Temporary loss of consciousness  * Confusion or feeling as if in a fog

* Amnesia surrounding the traumatic event
* Dizziness or “seeing stars”
* Ringing in the ears
* Nausea or vomiting
* Slurred speech
* Fatigue

The well-being of its Student Athletes is of paramount importance to the School. Coaches are trained annually in recognizing the signs and symptoms of concussions and are required immediately to remove from practice, conditioning, or a game any Student Athlete who shows such signs. Student Athletes will not be permitted to return until a Health Care Provider has either ruled out a concussion or determines the Student Athlete capable of returning. In no instance will a Student Athlete with a diagnosed concussion return the same day.
